

Strategic Focus Report - Enterprise IT Security: Technology and market trends

Global Enterprise IT Security Market Strategic Focus Research Report

ReportsWeb.com adds “Strategic Focus Report - Enterprise IT Security: Technology and market trends “to its store

Due to the rapid proliferation and adoption of disruptive technologies such as cloud, mobility, and social media, the risks to enterprise security are increasing as enterprises connect, interact, and share data with external stakeholders such as partners, suppliers, and customers. Constantly evolving technologies are transforming the way enterprises operate, meaning that they are seeking new ways to derive the maximum value from IT. However, this is creating new challenges for IT security, as the disruptive technologies of cloud, big data, analytics, mobile solutions, and social business are exposing enterprise data to an increased number of vulnerabilities.

View Complete Report @ <http://www.reportsweb.com/strategic-focus-report-enterprise-it-security-technology-and-market-trends>

Report Summary:

- Organizations are shifting their focus to open source tools that enable them to analyze security events and create their own security policies, thereby providing them with greater agility and control over their own security architecture.
- Economic and competitive pressures are pushing enterprises to implement solutions that help to reduce information technology overheads, and enable them to focus on core business areas. As a result, networking trends such as virtualization and software defined networks are gaining traction among enterprises.
- However, the security solutions developed to work with disruptive technologies such as cloud, mobility, and the IoT, require integration with existing organizational policies and processes, which can be challenging for security vendors.
